

Nature's Work

Environmental Policy

Nature's Work is committed to leading the way in minimising the environmental impact of its operations.

Key points of our strategy to deliver this commitment are:

1. Driving to reduce, Re-use and Recycle mantra into all aspects of our operations.
2. Commitment to educate clients about the environment through participation in our programmes.
3. Maximising links with environmental charities through our work.
4. Sharing best practice with clients by keeping updated and monitoring changes in the legislative, technical, social and moral climate.
5. Promote car sharing to local venues and field sites where possible and minimising distance to travel to these by appropriate and sensitive planning.

Jim Langley

Director of Nature's Work
